

TOC & EMERGENCY PLANS

Booklet 1: TOC Guide

The Mystery of the Missing Time Capsule

PURPOSE

A low-prep, fully offline Grade 6 mystery that blends reading, mathematics, science, Social Studies, Arts Education and ADST. Students collect clues and justify a final solution. It can fill two blocks, a half-day, or most of a day.

Estimated time	About 3-4 hours for all core tasks; 90 minutes for the short route
Materials	Booklet, pencils, erasers, rulers, colouring tools
Preparation	Photocopy student booklet. Keep answer key private.
Technology	None required. The core experience is completely offline.

FLEXIBLE SCHEDULE

Time	Suggested work	Stop here?
15 min	Introduce the case; pages 1-2	
35-45 min	Witnesses + Math Route	2-block: stop
35-45 min	Science + Community History	Half-day: stop
30-40 min	Code + Scene Reconstruction	
30-40 min	ADST + Logic Check	
30-45 min	Final solution + illustration	
15-20 min	Sharing, organization and cleanup	Always protect time

Short route (90 min): p. 2 introduction (10); pp. 3-4 witnesses and maths (25); pp. 5-6 evidence discussion (20); p. 10 logic (10); p. 11 final explanation (15); share and collect (10). Read aloud as needed. Save pp. 7-9 and 12 for more time. Pauses in the table are stopping points, not a solved case.

QUICK SUPPORT

While Students Work

HELP WITHOUT GIVING AWAY THE MYSTERY

- ☐ Read directions and witness statements aloud when helpful.
- ☐ Ask: “Which exact clue supports that idea?”
- ☐ Point students back to the map, timeline, or example.
- ☐ For math, have students solve one row at a time and mark each move.
- ☐ For the code, model only D → C.
- ☐ Accept labelled drawings, circling, or sentence starters instead of long writing.
- ☐ Do not confirm the final person, room, or reason until sharing.

PARTNER + MOVEMENT OPTIONS

Partners may compare one clue at the marked checkpoints, then continue independently. Optional 3-minute movement break: students stretch at their own places or trace three moves with a finger, then settle. Another option: gallery walk of ADST sketches without touching work.

SUGGESTED SHARING (15-20 MINUTES)

1. Students organize materials and circle their three strongest clues. 2. In pairs, each gives a 30-second case explanation. 3. Invite two or three different explanations. 4. Reveal the verified solution and discuss why evidence matters more than job titles or first guesses. 5. Collect booklets and return supplies.

LEAVE FOR THE CLASSROOM TEACHER

- ☐ all student booklets ☐ unfinished pages kept inside ☐ note about pages completed ☐ brief note on participation

Do not send the answer key home or place it in the Student/Family Hub.

BC GRADE 6

Curriculum Connections

ENGLISH LANGUAGE ARTS

Understand written/visual texts; infer and synthesize across clues; think critically and creatively; communicate an evidence-based explanation.

MATHEMATICS

Use patterns and logic; calculate in context; follow letter-number grid references, use decimal/fraction thinking and perimeter; explain decisions.

SCIENCE

Observe carefully; distinguish evidence from assumptions; identify patterns; plan a fair test; compare evidence with a prediction; communicate conclusions.

SOCIAL STUDIES

Use inquiry skills; interpret map and timeline evidence; sequence events; corroborate sources; consider perspectives, values and fair decisions.

ARTS EDUCATION

Use line, shape, space, symbols and comic sequence to communicate; develop and refine an individual visual work.

ADST

Identify a user need, criteria and constraints; generate a labelled design; explain how it meets the need; optionally improve it after feedback.

BUILT-IN ACCESS

Short directions, worked examples, stable clue labels, word banks, checkboxes, sentence starters, drawing choices, optional partner checks and optional challenge boxes support varied learners without separating students by ability. All essential work is independent, read-aloud friendly, device-free and does not depend on colour.

LOCAL CONTEXT NOTE

Cedar Ridge School and its Surrey neighbourhood are fictional. The booklet does not invent or use Indigenous teachings, names, symbols or cultures as mystery decoration.
