

Prepare the opening blocks

Ten flexible teaching blocks to place across the opening fortnight once classes settle. This is a sequence of selected lessons, not a full timetable. Keep school routines, specialists, movement, independent reading and breaks around it.

1 ELA: An ordinary object

45 min. Show a real key, spoon or projected object. Model three story beats. Partners notice five details and practise telling. Response sheet 1; no personal disclosure.

2 ELA: Retell and write

45 min. Revisit the listener question, retell, then write a six-sentence seed. Collect one clear revision; keep the work in class.

3 Maths: How big is this number?

45-55 min. Use the existing 0.008 lesson and model endpoints and equal intervals. Print the existing two-page number-line and period-chart sheet only as needed.

4 Maths: Change the scale

45-55 min. Revisit 0.008 on the three scales. Use the lesson's partner and independent checks. Ask for a reason, not only a plotted point.

5 ELA: Listen first

60-75 min; check source length. Preview the district source and protocol first. Use response sheet 2. If access or guidance is unclear, use the fictional rehearsal on page 2 of this guide and reschedule the source.

6 ELA: School-place soundwalk

55-65 min. Choose safe boundaries or a seated indoor spot. Use response sheet 3. Finish with a place postcard or a short soundscape and revise one detail.

7-8 Social Studies: Three maps of Fleetwood

Two flexible 45-55 min blocks. Use the supplied maps: first notice each map's visible details and job; then combine evidence and explain a mapmaker's choice. Pause between parts as needed.

9-10 Consolidate and respond

Two 45-55 min blocks. Use the evidence collected to revisit a maths misconception and improve a reading/writing response. Response sheet 4 supports either. Use the Time Capsule short route if an unexpected absence replaces these blocks.

Have the paper route ready

Print and prepare

Opening response sheets: p. 1 object story; p. 2 attributed listening; p. 3 soundwalk; p. 4 reusable evidence or maths response. Print selected pages rather than a booklet for every child. The existing maths sheet is separate.

Time Capsule emergency day: one 12-page student booklet each (six sheets double-sided), one 3-page TOC guide and one separate private 2-page answer key. For a 90-minute version print pp. 2-6, 10 and 11; read aloud and collect the final explanation.

Fictional listening rehearsal if the source is unavailable

Read this twice, introducing it as an original fictional Classroom OS practice text. It practises listening and attribution; it does not replace the Semiahmoo source or count as learning from that oral tradition.

"After lunch, Mina notices a paper envelope beneath the covered bench. The front says Room 12, but no name. She brings it unopened to the office. The secretary calls Room 12, and a student retrieves a set of handmade game cards before dismissal."

Model: HEARD - Mina brought it unopened to the office. INTERPRETED - She may have wanted to protect someone's privacy. WONDERED - Who left it there? Attribute as a teacher-read fictional Classroom OS practice text. Do not use this model as evidence about Chief Chappell's story.

Before using the live lessons

Open the exact lesson in Teach / Project on the school computer. Try Large Text, scroll to the last instruction, change lesson parts and open the needed PDF. For source lessons, preview media and current sharing directions. Keep printed inputs available if Wi-Fi fails.

What to keep and what to do next

Look for one useful observation, one explanation and one revision. Record a strength, the evidence for it and one next step. Keep ordinary practice in class; do not create an extra SpacesEDU upload for every activity.

Leave a TTOC the real bell times, attendance and dismissal routines, supervision, room changes and approved private support information. Add these in the existing day-plan builder or school system once confirmed; never put student details on the public site.

Prepared September 2026. Sequence and response sheets checked against current opening lesson content. School-device playback, physical printing and classroom pacing still need a real classroom trial.
