

Movement cards and timeline

Start here: Read the four fictional cards on the lesson screen. Sketch two places and a border; no real-world route is claimed.

Card 1 · Work and school

A family moves from a smaller town to a city in the same country after a parent finds work and an older child needs a nearby secondary school.

Card 2 · Work and family

A nurse accepts a job in another country. Their partner and child move with them to be closer to relatives.

Card 3 · Safety

After repeated flooding damages homes, several families move to an inland city in the same country.

Card 4 · Unknown

A caption says: New neighbours arrived this month. It gives no starting place, destination or reason.

City planning cards

Homes · school spaces · transit · health services · public space. Choose two to investigate for a fictional district expecting 100 new households.

Condition cards

Many residents rely on transit. The nearest school uses every classroom. New housing is far from clinics. Choose one; revise your plan.

Our thinking · name / team: _____

Before → during → after: write only what the story supports. Mark missing information with a question mark.

Name one change, one thing that continued, and why it matters. Do not invent feelings or a refugee status.
