

Test, revise, teach

Start here: Plan five 60-minute blocks. Keep the same small product; audience feedback is a reason to improve it, not rebuild it.

Block 1 · 60 minutes

Set up 10; paired tests 20; teach-backs 15; record signals 10; reset 5.

Block 2 · 60 minutes

Finish teach-backs and choose fixes 20; revise 35; reset 5.

Block 3 · 60 minutes

Finish revisions 25; accuracy/access check 15; rehearse 15; reset 5.

Block 4 · 60 minutes

Set up 10; three 10-minute exchange rounds (30); three 5-minute move/reset periods (15); debrief 5. In each round, use a 5–8 minute task then a question.

Block 5 · 60 minutes

More exchange or absences 20; individual reflection 20; select/upload final evidence 15; reset 5. Paper reflection can be uploaded during a later device block.

Feedback slip

I learned... I got stuck at... I need proof for... Creators: we changed one idea and one direction because...

Our thinking · name / team: _____

Before / audience evidence / content revision / participation revision / after.

Individual reflection: one thing I understand, the evidence that changed my thinking, my contribution, and one remaining limit. Share the team artifact once.
