

Keep the inquiry small

Start here: Reuse one Unit 3 case or Earth’s borrowing-station example. Ask one question a small team can investigate.

Bounded question

What could help shared supplies come back while keeping borrowing easy for everyone? This is the supplied fictional case, not a claim about our class.

Starting evidence

20 items were borrowed; 14 returned by the end of the day. Six locations are unknown. The count does not show theft or why items are missing.

Map labels

Visible result · possible cause · decision-maker · affected people · rule or resource. Use 4–6 boxes. Solid arrows for supported links; dashed arrows for ideas to check.

Change cards

Add a reachable return tray; change the borrowing routine; publish an anonymous item count. Trace three possible effects, including an access barrier or extra work.

Our thinking · name / team: _____

Our question / why it matters / 4-6 box map with sources / one possible change / one unknown.

Finish a useful map before adding more research. No separate upload.
