

Monday learning

Name _____

Compare numbers. Explore fairness. Plan a game story.

Point, say, draw or write. Someone can record your ideas.

Compare numbers

Use the number line or objects if they help.

Choose $<$, $>$ or $=$. You can also say the comparison.

$<$ less than $>$ greater than $=$ equal

24 _____ 29	36 _____ 31
28 _____ 28	20 _____ 40
35 _____ 38	32 _____ 23

Choose one pair. How do you know?

I know because _____

Optional stretch

24.5 _____ 24.2 Which place helps you decide?

Optional copy practice: copy a number you used.

Think about a fair community

What could help people take part?

Point, tell, draw or write your ideas.

1 Choose one concern

Some people do not get a turn.

Some people cannot use a shared space.

Or choose your own concern.

My concern

2 Who is affected

Who finds it hard to take part? Who else is affected?

3 What could improve

We could

4 Why would this help

Choose a reason or use your own.

More people could join. People could get what they need.

This would help because

Plan a character and story

Create your own story for a Bloxels game.

Circle choices, point, draw or tell someone your ideas.

1 My character

Name _____

Draw the character or add words.

2 What does the character want

find something help someone reach a place
Or use your own idea.

My character wants to _____

3 Where does the story happen

a forest a school a sky city my own place

My setting is _____

4 What gets in the way

a broken bridge a locked gate a storm
Or use your own problem.

The problem is _____

Tell the opening of your story

Use the ideas on your character page.

Tell it first. Then draw, write or ask someone to scribe.

Who is there and where are they?

_____ was in _____.

What does the character want?

They wanted to _____

What problem begins?

But _____

Draw the opening scene

Optional: Add one thing the character sees or hears.

Plan one small game level

Use your character, setting and problem.

Sketch on paper today. Try one small build on Tuesday.

Add these three parts

S = start **O = obstacle** **G = goal**

Mark S, O and G. Draw a path from the start to the goal.

You can point while a partner draws.

Tell how the player gets past the obstacle

The player can

Tuesday first build

Build the start, one obstacle and the goal. Then test it.

What will you check?

Can the player start? Can they get past? Can they finish?
